MAKING RFID EASY TO USE
ThingMagic is dedicated to driving the barriers to deploying RFID technology as low as possible. We design our products to be easy to use out-of-the-box and to deliver predictable, reliable, and repeatable performance. Our development tools require little RFID expertise, enabling you to rapidly design, test, and deploy your RFID solutions.

ThingMagic is The Engine in RFID® for a wide range of industrial and consumer applications
As a leading provider of RFID technology and solutions, our goal is to provide customers with the broadest choice of RFID readers and system design guidance to ensure predictable performance and solution optimization.

We focus on developing products and solutions that address your needs for manageability, scalability, security, low total cost of ownership, and enterprise network integration.

Our standards-based products are available worldwide from a growing number of OEM partners, resellers, and system integrators.

Making RFID Easy to Use
ThingMagic is dedicated to driving the barriers to deploying RFID technology as low as possible. We design our products to be easy to use out-of-the-box and to deliver predictable, reliable, and repeatable performance. Our development tools require little RFID expertise, enabling you to rapidly design, test, and deploy your RFID solutions.

Developers Kit
Everything needed to read and write RFID tags and begin developing RFID-enabled applications:
- Test chassis
- Cables
- Antenna
- Sample Tags
- Full schematics to help you design your own complementary components

Mercury API
A common development platform, supporting an extensive variety of hardware to connect, configure, and control ThingMagic readers.

Universal Reader Assistant
A utility for advanced demo, testing, and tuning of all ThingMagic readers. Reduces complexity for novice users while permitting low-level control for advanced developers.

6.26.13
With a focus on open, standards-based RFID readers, sensors, and other embedded technologies, we are committed to providing customers with the products and architectural guidance to succeed.

At ThingMagic, a Division of Trimble, we believe that RFID-enabled products and solutions will fundamentally change the way we interact with the physical world. By embedding RFID and sensing technology into everyday products, productivity can be optimized and inefficiencies can be reduced across nearly every market imaginable.

A full range of products – on one powerful architecture – to deliver real-time business process improvement

With a focus on open, standards-based RFID readers, sensors, and other embedded and low cost computing technologies, we are committed to providing customers with seemingly impossible sensor and embedded technology-related challenges.

Our software defined radio (SDR) architecture provides a future-proof choice, accommodating new tags and evolving RFID standards, and supporting security advancements and other system and technology innovation.

We’ve developed our products for the most demanding high volume applications and our consulting and design services consistently exceed the needs of clients across a variety of operating conditions.

Whether you are investigating RFID for the first time or have an evolved RFID practice, we have the products, expertise and experience to help you develop applications, deploy solutions and optimize performance.

Unprecedented Functionality, Performance and Value

ThingMagic is The Engine in RFID for a wide variety of cutting-edge solutions. Hundreds of companies - from printer and handheld manufacturers to asset tracking, supply chain, healthcare and transportation organizations – are using ThingMagic RFID products and services to drive innovation and create business process change.

UHF RFID Modules

ThingMagic’s embedded modules are ideal for adding UHF RFID read/write capabilities to application-specific devices. Customers choose ThingMagic RFID modules for their small form factor, ease of integration, and superior tag read rate across a variety of operating conditions.

Finished / Fixed-Position UHF RFID Readers

Built on our UHF RFID embedded modules, ThingMagic finished/fixed-position readers speed RFID solution development and integration. Our readers and development kits include all of the components necessary to begin reading and writing RFID tags and more!

Fixed/Multiprotocol: Mercury6

Low profile, high-performance 4-port RFID reader delivering extreme utility across indoor and outdoor applications. Rugged service operating capabilities, high transmit power, Power over Ethernet (PoE) and Wi-Fi options make the Mercury6 well suited for enterprise, commercial and industrial environments.

Integrated: Astra-EX

Low profile, easy to install, integrated reader designed for use in enterprise, industrial and supply chain environments where unobtrusive deployment is desired. Power over Ethernet (PoE) and Wi-Fi options allow for flexible, low-cost, single-cable installations.

Ruggedized: Vega

Durable reader meets the harsh environmental operating standards required for a wide variety of indoor, outdoor and in-vehicle applications. Utilizes a local personal computer (not included) to provide command and control via its RS-232 serial interface.

Desktop: USB Plus+ Reader

A low-cost platform for developing and deploying interactive read/write applications. Controlled and powered by a host PC or laptop through a USB interface.
The uses of Radio Frequency Identification (RFID) are many and the applications being developed to include RFID are boundless. RFID is rapidly growing from a vertically-oriented technology to an integrated element of critical business processes. Once viewed as the ultimate technology for optimizing retail logistics, RFID is now for the supply chain and much more.

At ThingMagic, a Division of Trimble, we believe that RFID-enabled products and solutions will fundamentally change the way we interact with the physical world. By embedding RFID and sensing technology into everyday products, productivity can be optimized and inefficiencies can be reduced across nearly every market imaginable.

ThingMagic readers and development kits are scalable and have integrated software and hardware for all the components necessary to begin reading and writing RFID tags and more!

We've developed our products for the most demanding high volume applications and our consulting and design services consistently exceed the needs of clients with seemingly impossible sensor and embedded technology-related challenges.

Whether you are investigating RFID for the first time or have an evolved RFID practice, we have the products, expertise and experience to help you develop applications, deploy solutions and optimize performance.

ThingMagic products offer:

- Ease of integration and use
- A common development platform for all of your RFID product or solution needs
- Time to market advantage
- Low total cost of ownership
- A standards based architecture
- Superior performance in diverse conditions

We serve organizations in many markets, including:

- Manufacturing
- Transportation
- Construction
- Retail
- Hospitality
- Healthcare
- Government
- Communications & Utilities
- Aerospace

Trimble RFID Solutions

Enterprise organizations are often challenged with unique requirements when designing and deploying an RFID solution. We can help! Our capabilities include systems design, RFID hardware (readers, tags, antennas), database web hosting, integration with third-party systems, and installation and maintenance services. Transform your vision into reality and create a sustainable competitive advantage for your company. Contact us for more information at: sales@thingmagic.com.
